

Anti-Vibe-Coder

Documentation Binder

Brock University

COSC 4P02 – Group 16 Project

Virtual Binder Package

Group Name: Last Minute Warriors

Project Name: Anti-Vibe-Coder

Document Type: Project Documentation Binder

Course: COSC 4P02

Institution: Brock University

Date: April 26, 2026

This binder contains the main project documentation for the Anti-Vibe-Coder system, including requirements, technical design, installation instructions, user documentation, maintenance information, and issue resolution support.

Table of Contents

This virtual binder is organized like a physical project binder. Each document is numbered in the recommended reading order so that the documentation package is easy to follow.

1. 01_SRS_V1.pdf

Software Requirements Specification Version 1. This document contains the original requirements for the Anti-Vibe-Coder system, including the early project scope, functional requirements, and system expectations.

2. 02_SRS_V2.pdf

Software Requirements Specification Version 2. This document contains the updated requirements and reflects later changes made to the system design, user workflows, and project scope.

3. 03_Theory_of_Operation.pdf

Explains how the system works at a high level. This includes the overall workflow, how submissions are processed, how similarity analysis is performed, and how the main system components interact.

4. 04_Technical_Specification.pdf

Provides the detailed technical design of the system, including architecture, backend services, frontend structure, database design, detection engine details, and implementation decisions.

5. 05_Installation_Guide.pdf

Provides instructions for installing, configuring, and running the Anti-Vibe-Coder system. This document is intended for developers, maintainers, or evaluators who need to set up the project environment.

6. 06_User_Manual.pdf

Provides instructions for using the system. This includes the main user workflows for instructors and students, such as creating assignments, submitting code, running analysis, and reviewing similarity results.

7. 07_Maintenance_Manual.pdf

Describes how the system should be maintained after deployment. This includes general maintenance tasks, updates, monitoring, backups, and support responsibilities.

8. 08_Issue_Resolution_Guide.pdf

Provides troubleshooting information for common problems. This document explains possible issues, causes, and recommended steps for resolving them.

Virtual Binder Folder Structure

The documentation package should be submitted as one main folder containing the numbered PDF files shown below.

```
Group16_AntiVibeCoder_Documentation_Binder/

|-- 06_User_Manual.pdf  
|-- 07_Maintenance_Manual.pdf  
|-- 08_Issue_Resolution_Guide.pdf
```

Notes

This documentation binder is intended to provide a complete overview of the Anti-Vibe-Coder project. The documents are arranged from general project requirements to technical design, setup instructions, user guidance, and maintenance support. This order allows readers to first understand what the system is supposed to do, then how it works, then how to install, use, and maintain it.
